
(a) Gaussian ζ, scale-invariant spectrum
excluded by μ distortions
e± annihilation
decoupling neutrinos
T_dec = 0.75–1.5 MeV
perfect fluid
mass function ψ(M_PBH)
black-hole mass M_PBH (M⊙)
(b) three statistics, β_pf = 10^−12
power law, n = 5
stretched exp., η = 0.6
Gaussian
probability ratio β_ν/β_pf
horizon mass at horizon crossing M_H (M⊙)
